

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

A liquid-jet head and a manufacturing method thereof are provided. The liquid-jet head includes a channel substrate which has pressure generation chambers formed therein and communicating nozzle orifices for discharging liquid droplets, and piezoelectric elements. The piezoelectric element includes a lower electrode, a piezoelectric layer and an upper electrode, and disposed on one surface of the channel substrate via a vibration plate, wherin at least pattern regions of the respective layers which constitute the piezoelectric element are covered with an insulating film formed of an inorganic insulating material.
